# ANUPAMA BHATTA

Ann Arbor, MI • (478) 305-5404 • bhatta.anupama1@gmail.com • linkedin.com/in/anupama-bhatta • anupamabhatta.github.io

## SKILLS

**Programming Languages:** Python, SQL, R, JavaScript, Java
**ML & Analytics:** pandas, NumPy, scikit-learn, XGBoost, PyTorch, TensorFlow, NLTK, LangChain, Spark, PySpark
**Data Visualization & BI:** Tableau, Power BI, Power BI Service, Looker Studio, Matplotlib, Plotly, Excel, Mixpanel, DAX, Power Query
**Databases & Cloud:** MySQL, MongoDB, Snowflake, AWS
**Development Tools:** Git, GitHub, VS Code, DataGrip, Jupyter, Docker, React, Next.js
**Certifications:** Google Data Analytics Professional Certificate, Advanced Google Analytics Certificate, HIPAA Overview for End Users

## EXPERIENCE

**Loyal Health**, Atlanta, GA **August 2025 – Present**
*Senior Data Analyst*

- Deliver ~50 inherited recurring reports across Looker Studio and Power BI for 35+ health system clients, authoring and running underlying SQL queries each cycle to extract and validate data spanning patient scheduling, outreach, chatbot, and site search.
- Independently reverse-engineer legacy SQL queries powering 20+ dormant customer-facing reports across Looker Studio and Power BI, reconstructing undocumented logic and rewriting queries to restore 100% on-time delivery in half the allotted time.
- Lead migration and centralization of client reporting infrastructure by rebuilding reports natively in Power BI and deploying to Power BI Service, enabling automated scheduled refresh and eliminating manual update cycles across client dashboards.
- Conduct BI vendor evaluation across major platforms including Tableau, Sigma, Power BI, and Looker, assessing scalability, embedding analytics, and compliance to deliver strategic recommendations on long-term client reporting infrastructure.
- Partner with Customer Success to evaluate backend data and identify opportunities to deepen client reporting, designing and delivering enhancements such as drop-off analytics to surface actionable patient journey insights across client accounts.

**University of Michigan**, Ann Arbor, MI **August 2023 – May 2025**
*Graduate Teaching Assistant*

- Designed course materials spanning statistical analysis, Python programming, and applied data science for 500+ undergraduate and graduate students across three courses, crafting exercises in quantitative modeling, data manipulation, and predictive modeling.
- Provided dedicated student support through scheduled office hours, conducting code reviews and breaking down complex concepts to foster confidence and independent problem-solving; nominated for the Outstanding Graduate Student Instructor Award.

**University of Michigan**, Ann Arbor, MI **May 2024 – August 2024**
*Information Visualization Intern*

- Built an interactive social media design evolution timeline using JavaScript, Timeline JS, and React, integrating API-retrieved JSON data to create a universally accessible research archive serving audiences from general public to academic researchers.
- Ensured accessibility and performance across all user levels through WCAG compliance, inclusive design principles, responsive interface refinements, and iterative user testing, achieving consistent cross-device rendering across desktop and mobile.

**Loyal Health**, Atlanta, GA **May 2022 – May 2023**
*Senior Solutions Analyst (Promoted from Solutions Analyst)*

- Implemented bi-directional Python API integrations syncing healthcare provider data between enterprise SQL databases and major search engines including Google and Bing, ensuring 99% data accuracy across third-party platforms for 35+ health system clients.
- Optimized client healthcare listings through keyword research, competitor analysis, and Google Business Profile enhancements, improving local search engine rankings by up to 10 positions to increase organic traffic to client provider and location listings.

**Loyal Health**, Atlanta, GA **August 2020 – April 2022**
*Solutions Analyst*

- Developed automated SQL validation protocols including schema verification, duplicate detection, and cross-platform integrity checks for 3,000+ healthcare providers and locations, reducing system errors by 75% across integration environments.
- Built Looker Studio dashboards delivering monthly Google Business Profile performance reports to clients, tracking views, searches, actions, ratings, and reviews to surface actionable insights into listing visibility and patient engagement.

## EDUCATION

**University of Michigan School of Information**, Ann Arbor, MI **May 2025**
*Master of Science in Information, Big Data Analytics | GPA: 3.9/4.0*

**Wesleyan College,** Macon, GA **May 2020**
*Bachelor of Arts in Applied Data Analysis, Minor in Economics | GPA: 4.0/4.0 | President's Scholar*
