ANUPAMA BHATTA

Ann Arbor, MI • (478) 305-5404 • bhatta.anupama1@gmail.com • linkedin.com/in/anupama-bhatta • anupamabhatta.github.io

SKILLS

Programming Languages: Python, SQL, R, JavaScript, Java
ML & Analytics: pandas, NumPy, scikit-learn, XGBoost, PyTorch, TensorFlow, NLTK, LangChain, Spark, PySpark
Data Visualization & BI: Tableau, Power BI, Power BI Service, Looker Studio, Matplotlib, Plotly, Excel, Mixpanel, DAX, Power Query
Databases & Cloud: MySQL, MongoDB, Snowflake, AWS
Development Tools: Git, GitHub, VS Code, DataGrip, Jupyter, Docker, React, Next.js
Certifications: Google Data Analytics Professional Certificate, Advanced Google Analytics Certificate, HIPAA Overview for End Users

EXPERIENCE

Loyal Health, Atlanta, GA **August 2025 – Present**
Senior Data Analyst

- Lead migration and centralization of client reporting infrastructure by rebuilding reports natively in Power BI and deploying to Power BI Service, consolidating a three-analyst function into a single centralized operation and saving 960 hours annually.
- Independently reverse-engineer legacy SQL queries powering 10 dormant customer-facing reports in Looker Studio, reconstructing undocumented logic and resolving 15+ data infrastructure issues to restore 100% on-time delivery in half the allotted time.
- Deliver 45 recurring client reports across Power BI and Looker Studio, authoring and running underlying SQL queries and Power Query transformations each cycle to extract and validate data, reducing maintenance hours by 59% through standardized processes.
- Conduct BI vendor evaluation across major platforms, performing cost feasibility analysis to assess scalability and governance, delivering findings that resulted in a strategic decision to pause external platform migration and reprioritize company resources.
- Partner with Customer Success to identify unaddressed gaps in client reporting and deliver 10+ analytics and engagement enhancements across solutions, including drop-off analytics, to surface patient journey insights previously unavailable to clients.

University of Michigan School of Information, Ann Arbor, MI **August 2023 – May 2025**
Graduate Teaching Assistant

- Designed course materials spanning statistical analysis, Python programming, and applied data science for 500+ undergraduate and graduate students across three courses, crafting exercises in quantitative modeling, data manipulation, and predictive modeling.
- Provided dedicated student support through scheduled office hours, conducting code reviews and breaking down complex concepts to foster confidence and independent problem-solving; nominated for the Outstanding Graduate Student Instructor Award.

University of Michigan School of Information, Ann Arbor, MI **May 2024 – August 2024**
Information Visualization Intern

- Built an interactive social media design evolution timeline using JavaScript, Timeline JS, and React, integrating API-retrieved JSON data to create a universally accessible research archive serving audiences from general public to academic researchers.
- Ensured accessibility and performance across all user levels through WCAG compliance, inclusive design principles, responsive interface refinements, and iterative user testing, achieving consistent cross-device rendering across desktop and mobile.

Loyal Health, Atlanta, GA **May 2022 – May 2023**
Senior Solutions Analyst (Promoted from Solutions Analyst)

- Implemented bi-directional Python API integrations syncing healthcare provider data between enterprise SQL databases and major search engines including Google and Bing, ensuring 99% data accuracy across third-party platforms for 35+ health system clients.
- Optimized client healthcare listings through targeted keyword research, competitor analysis, and Google Business Profile enhancements, improving local search rankings by up to 10 positions to drive organic traffic to provider and location listings.

Loyal Health, Atlanta, GA **August 2020 – April 2022**
Solutions Analyst

- Developed automated SQL validation protocols including schema verification, duplicate detection, and cross-platform integrity checks for 3,000+ healthcare providers and locations, reducing system errors by 75% across integration environments.
- Built Looker Studio dashboards delivering monthly Google Business Profile performance reports to clients, tracking views, searches, actions, and ratings to drive data-informed decisions on listing visibility and patient engagement strategy.

EDUCATION

University of Michigan School of Information, Ann Arbor, MI **May 2025**
Master of Science in Information, Big Data Analytics | GPA: 3.9/4.0

Wesleyan College, Macon, GA **May 2020**
Bachelor of Arts in Applied Data Analysis, Minor in Economics | GPA: 4.0/4.0 | President's Scholar
