SUMMARY

Senior Data Analyst with 5+ years across healthcare technology and academia. Began in solutions engineering at Loyal Health, left to earn an MS in Information at the University of Michigan while teaching data analysis using Python and SQL to 500+ students as a Graduate Teaching Assistant, before returning to lead reporting infrastructure at Loyal. Proficient in SQL, Python, Power BI, and DAX, with a record of consolidating a three-analyst reporting function into one, saving 80+ hours monthly through standardized, automated processes.

SKILLS

Programming Languages: Python, SQL, R, JavaScript, Java
ML & Analytics: pandas, NumPy, scikit-learn, PyTorch, TensorFlow, SciPy, XGBoost, NLTK, LangChain, Spark, PySpark
Data Visualization & BI: Tableau, Power BI, Power BI Service, Looker Studio, Matplotlib, Plotly, Excel, Mixpanel, DAX, Power Query
Databases & Cloud: MySQL, MongoDB, Snowflake, AWS
Development Tools: Git, GitHub, Jira, VS Code, DataGrip, Jupyter, Docker, Claude, Claude Cowork, GitHub Copilot, React, Next.js
Certifications: Advanced Google Analytics Certificate, Google Data Analytics Professional Certificate, HIPAA Overview for End Users

EXPERIENCE

Loyal Health (a Clarify Health company), Atlanta, GA **August 2025 – Present**
Senior Data Analyst

- Lead a two-year retrospective business review for a contract-at-risk healthcare account, reframing four solutions around delivered value, including an estimated $10M in completed-encounter value from one solution, with independent metrics for the rest.
- Drive design, development, and centralization of client reporting infrastructure by rebuilding reports natively in Power BI and deploying to Power BI Service, consolidating a three-analyst function into one operation and saving 80+ hours monthly.
- Independently reverse-engineer legacy SQL queries powering 10 dormant healthcare reports, performing root cause analysis to resolve 15+ data accuracy and integrity issues, restoring all 10 reports to full, on-time delivery in half the projected timeline.
- Deliver 45 recurring healthcare client reports across Power BI and Looker Studio, authoring complex SQL queries, DAX measures, and Power Query transformations each cycle to validate data, reducing maintenance hours by 59% through automation.
- Partner with Customer Success to identify unaddressed gaps in client reporting and deliver 10+ analytics and engagement enhancements, including drop-off and user journey analysis, surfacing behavioral insights previously unavailable to clients.

University of Michigan School of Information, Ann Arbor, MI **August 2023 – May 2025**
Graduate Teaching Assistant

- Designed course materials spanning exploratory analysis and applied data science using Python and SQL for 500+ undergraduate and graduate students across three courses, crafting exercises in data manipulation, predictive modeling, and model evaluation.
- Provided dedicated student support through scheduled office hours, conducting code reviews and breaking down complex concepts to foster confidence and independent problem-solving; nominated for the Outstanding Graduate Student Instructor Award.

Loyal Health (a Clarify Health company), Atlanta, GA **August 2020 – May 2023**
Senior Solutions Analyst (Promoted from Solutions Analyst in May 2022)

- Implemented bi-directional Python API integrations syncing healthcare provider data between enterprise SQL databases and major search engines including Google and Bing, ensuring 99% data accuracy across third-party platforms for 35+ health system clients.
- Developed automated SQL validation protocols including schema verification, duplicate detection, and cross-platform consistency checks for 3,000+ healthcare providers and locations, reducing system errors by 75% through process automation.
- Built Looker Studio dashboards delivering monthly Google Business Profile performance reports to clients, tracking views, searches, actions, and ratings to drive data-informed decisions on listing visibility and patient engagement strategy.

PROJECTS

- **Jane Addams Digital Edition** — Built a full-stack Python tool that parses 55,000+ historical documents to extract relationships and renders them as an animated, interactive correspondence network, adopted by the Jane Addams Papers Project.
- **Office Meeting Success Predictor** — Built a full-stack Python NLP tool segmenting raw dialogue via a custom detection algorithm and training a logistic regression classifier achieving 77% accuracy behind an interactive prediction interface.
- **Global Diet & Longevity Analysis** — Built interactive Tableau dashboards analyzing 60 years of global dietary and life expectancy data across 190+ countries, linking Shannon-index macronutrient diversity to longevity in a narrative case study.

EDUCATION

University of Michigan School of Information, Ann Arbor, MI **May 2025**
Master of Science in Information, Big Data Analytics | GPA: 3.9/4.0

Wesleyan College, Macon, GA **May 2020**
Bachelor of Arts in Applied Data Analysis, Minor in Economics | GPA: 4.0/4.0 | President's Scholar
